Subject: Submittal for approval

Project:

Spectrum Portland & Lime Cements (Type N or S) Gray or White

Product information:

Architects and design professionals often prefer blended Portland and Lime cements over masonry cements for their projects. This is due to the outstanding compressive strength, shear strength, flexural bond strength and low water penetration that Portland and lime cements offer. SPECTRUM offers a complete line of blended Portland and Lime cement products that when properly mixed with sand conforming to ASTM C-144 will produce a high quality mortar that meets or exceeds ASTM C-270.

SPECTRUM GRAY CEMENT, TYPE N OR TYPE S

Perfectly blended Portland Cement Type I meeting the requirements of ASTM C-150 and Hydrated Lime meeting ASTM C- 207.

Type N Gray Cement is blended to the ratio of 1 part of Portland Type 1 and 1 part of Hydrated Lime, by volume.

Type S Gray Cement is blended to the ratio of 1 part of Portland Type 1 and 1/2 part of Hydrated Lime, by volume.

SPECTRUM WHITE CEMENT, TYPE N OR TYPE S

Perfectly blended White Portland Cement Type I meeting the requirements of ASTM C-150 and Hydrated Lime meeting ASTM C-207.

Type N White Cement is blended to the ratio of 1 part of Portland Type 1 and 1 part of Hydrated Lime, by volume.

Type S White Cement is blended to the ratio of 1 part of Portland Type 1 and 1/2 part of Hydrated Lime, by volume.

AHI suggests that the project Engineer and/or Architect, masonry contractor and all other appropriate parties review this product & submittal and determine its acceptability prior to the initiation of the project. Should you require information on the ASTM Specifications controlling our product, samples of our product, Material Safety Data Sheets, references or if we may be of service to you in any way, please contact us.

Manufactured in Buda, Texas by: SPECTRUM CEMENT (Division of AHI)
