Project:

Chemline Type S Lime

We propose to furnish Type S Lime as manufactured by the Chemical Lime Co. of New Braunfels, Texas. Chemical Lime is one of only a handful of companies in the US that produce this specific product, and are the only producer in Texas. I have personally been selling product produced from this plant for more than twenty years with positive results. Chances are good that you have seen this widely used material on some of your previous projects.

This Lime conforms to ASTM C-206 Type S and ASTM C-207 Type S and when properly mixed with cement and sand will produce a mortar that conforms to ASTM C-270 Type N,S,M or O. The product comes in a bag containing approximately 1.25 cubic foot of lime that weighs 50 lbs. Should you need samples of this product, Material Safety Data Sheets, references or if we may be of service to you in any way, please let us know.

**Thank you for the opportunity of furnishing this
quality product on your important project!**
