**Project:**

### **Spectrum Acrylic Paint**

#### **Product information**

Spectrum Acrylic Paint is an acrylic-based product that is a weather resistant wall coating. This product is available in 30 standard colors. AHI also has the ability to make Custom tints to match existing color inspirations by our trained experts. Spectrum Acrylic Paint comes with a 5 year limited material warranty.

#### **Features**

Decorative colors

Alkali resistant

Water Resistant

Interior or Exterior

Roller/Brush or Spray Apply

#### **General information**

Spectrum Acrylic Paint is used as a decorative coating over sheetrock, wood-based sheathings, metal, stucco and any cementitious surface, (stucco, block, poured concrete and masonry surfaces). Clean area and remove all dust, grease, oil, paint, dirt, efflorescence and any unsound concrete. Please note that Spectrum Acrylic Primer must be applied over uncured cementitious materials to ensure that improper pH levels do not cause paint coating failures or shadowing issues. This will also help prevent water from penetrating beneath the finish and cause peeling. Thoroughly mix paint to a smooth, homogeneous consistency before application. Please note that you should not apply paint coating when the temperature outside is lower than 30 degrees Fahrenheit or when frost is predicted. Do not use in wet areas and protect work from rain for at least 24 hours.

#### **Coverage**

All coverages are approximate, Spectrum Acrylic Paint will cover 1500-1800 sq. ft at 4 mils thick wet application. Certain colors may require two coats for complete hide. Coverage also depends on surface texture, porosity and application method.

**Thank you for the opportunity of furnishing this quality product on your important project! We look forward to working with you all!**
